Possible Hazards Present		Personal Protection		Additional Training	
		Required			
<ul> <li>Cuts/lacerations</li> <li>Flying debris</li> <li>Hearing loss</li> <li>Flammable materials</li> <li>Sprains or strains</li> </ul>		CSA approved - footwear - hard hat - face shield/eyewear - hearing protection - chain saw chaps		- WHMIS - Power tool safety - Safe fueling	

- 1. Ensure the worker has been properly trained
- 2. Workers must read and understand the operator's manual before operating the chain saw.
- 3. Check the chainsaw before each use for defective or dull chains, chain tension, guards and shields, fluid levels, proper lubrication.
- 4. Wear required PPE at all times.
- 5. Always use both hands when starting the saw. Grip the top handle with one hand and pull the rope quickly with the other hand.
- 6. Always start it on the ground or on a stable clear surface, never hold it mid air.
- 7. Never force the saw through a cut. If properly sharpened and adjusted it will nearly cut through the piece by itself.
- 8. Always watch for blade pinching situations. Cut branches at the base of the blade; do not saw with the tip of the blade.
- 9. Use a high chain speed for all cuts.
- 10. Keep the saw teeth sharp so they will cut, dull teeth are more likely to cause a kick back.
- 11. Always cut below shoulder height.
- 12. Don't stand on a log and cut between your feet.
- 13. Always stand to the side of the material you are cutting, branches, etc.
- 14. Do not make adjustments to a running saw.
- 15. Be aware where the chain will go if it breaks. Never position yourself or others in line with the chain.
- 16. Keep the chain out of dirt. Debris will fly and the teeth will be dulled.
- 17. Refuel in well ventilated areas when the machine has cooled down.
- 18. Use a bar guard when transporting & never carry in a passenger compartment.
- 19. REPORT ANY DANGEROUS SITUATIONS TO THE SUPERVISOR.

## Documentation/Legislation

- Operators manual
- Part 40, Forestry and Arboriculture

This Safe Work Procedure will be reviewed anytime the task, equipment or materials change and at a minimum every three years.
