Possible Hazards Present	Personal Protection Required	Additional Training	
<ul style="list-style-type: none"> - Cuts-sharp metal - Slips and falls - Weather - Electrical wires 	<ul style="list-style-type: none"> - Fall protection Harness - Gloves - CSA approved head protection - CSA approved foot wear 	<ul style="list-style-type: none"> - Fall Protection - PPE 	
<ol style="list-style-type: none"> 1. Do not use the bracket for any purpose other than intended. 2. All workers installing and using anchors must be fully trained. 3. Visually inspect the bracket for damage or defect prior to installation. 4. Inspect the roof trusses to ensure they are free of defects. 5. Place the roof bracket at the peak of the structure with the connection loop pointing upward. 6. Ensure the center of the bracket is positioned over the center line of the truss. 7. Fasten the bracket with the nails provided. 8. Attach the connecting line through the connection loop and the D ring of the harness. 9. When finished hammer the upper tab flat and cap over the entire bracket. 10. REPORT ANY DANGEROUS SITUATIONS TO THE SUPERVISOR.
